

MICROCORD

Crysta-Plus M Series

Manual Coordinate Measuring Machine

COORDINATE
MEASURING MACHII

Mitutoyo

Crysta-Plus M: More quality, right down to the very last detail.

All-in-all the most economical solution

Construction Maintains High Accuracy for Long Periods

The Crysta-Plus M series features the world's highest measuring accuracy in manual coordinate measuring machines. The main unit base is manufactured from high-reliability Graplate (precision granite surface plate), which provides high-rigidity construction with extremely-small secular change by integrating the Y-axis guide rail with the measuring table.

X-, Y- and Z-axis guides are equipped with high-accuracy air bearings to provide excellent linearity and sliding smoothness to that the operator can move the stylus around the workpiece with minimum effort. The length measuring system of each axis employs a high-accuracy glass scales and linear encoders to enable long-term accuracy stability combined with negligible maintenance requirements apart from normal servicing.

Each Axis Clamp Switch and X/Y Fine Feed Knob

The X, Y and Z axes can be individually clamped with a one-touch air clamp. Each axis can be finely adjusted over the entire measuring range when in the clamped state.

In the Crysta-Plus M443/M500 series, the X- and Y-axis fine-feed knobs are grouped together on the front of the main unit for convenience. When the centering microscope CF20 is installed, for example, these knobs allow easy and precise positioning without causing the operator strain or forcing an uncomfortable posture.

The Crysta-Plus M700 series is provided with a

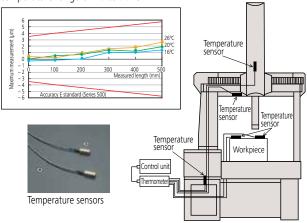

coarse-feed knob for each axis (18.85mm/revolution)

as well as fine feed (0.99mm/revolution) to enable easy handling of this larger machine. Additionally, adoption of the Mobile Clamp Box allows the operator to perform clamping operations on each axis from just one location.

Temperature Compensation Function

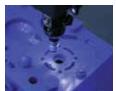

The Crysta-Plus M series is standard equipped with the temperature compensation function. This function uses multiple sensors to assure maintenance of the specified accuracy over the wide operating temperature range of 15 to 30°C.

Handy Illuminator and Disable Switch

- In order to greatly improve workability during measurement of fine geometry or a deep hole, the white LED illuminator can be installed. (Option)
- In order to prevent unintentional triggering of the probe when changing the probe orientation or replacing a stylus, an ON/OFF switch (Disable switch) is provided on the probe holder. (Standard)

Probes

Touch-trigger Probe MH20

XY: 0.08N

Repeatability

Trigger force

Touch-trigger Probe MH20i

 $2\sigma \leq 0.35\mu m$ (When using standard stylus)

Z: 0.75N

Probe modules

Centering Microscope CF20

The centering microscope is best suited to measuring a small hole into which a stylus cannot be inserted, plastic or rubber items or a thin workpiece which would be deformed by contact with a touch-trigger probe stylus.

Note: The auxiliary weight set is required if the CF20 is installed.

High operability, cost effectiveness, environmental resistance and performance

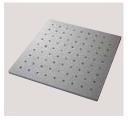

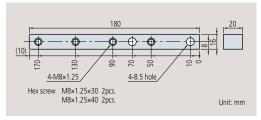

Application

Clamping kit

Workpiece Sub-plate

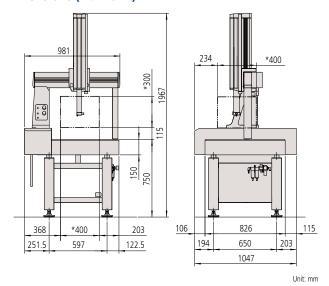

Extension arm set

Crysta-Plus M443 / M500 / M700 Series **Specifications**

Specifications

Item	Model	Crysta-Plus M443	
rem	X axis	400mm	
Measuring range	Y axis	400mm	
measuring range	7 axis	300mm	
Resolution		0.0005mm	
Accuracy (20°C)	Measuring error (E)	(3.0+4L/1000)µm *³	
ISO 10360-2 *1, *2	Probing error (R)	4.0µm	
Temperature comp	pensation function	Standard	
Length standard		Linear encoder	
Guide method		Air bearing on each axis	
Clamping on each axis		One-touch air clamp	
Fine feed of each axis		Continuous fine feed over the entire measuring range on each axis	
Measuring table	Effective size	624mm×805mm	
ivieasuring table	Material	Granite	
Workpiece	Maximum height	480mm	
vvorkpiece	Maximum mass	180kg	
Z-axis balancing m	ethod	Counterweight (adjustable by 1.5kg)	
	Width	981mm	
Machine dimensions	Depth	1047mm	
	Height	1967mm	
Mass of main unit (including machine stand)		410kg	
	Pressure	0.35MPa (air source: 0.5-0.9MPa)	
Air supply	Consumption (Under normal conditions)	50L/min (air source: 100L/min)	

Specifications

Air supply	Consumption (Under normal conditions)	50L/min (air source: 100L/min)	

Guaranteed accuracy temperature limits

Range 1	5 to 30 °C
Rate of change 2°	2°C per hour or less, 5°C in 24 hours or less
Gradient 1	°C or less per meter (both horizontal and vertical direction)

^{*1:} According to ISO 10360-2 methods

^{*1.} According to 155 1556-2 metricus

*2: When using the touch-trigger probe MH20i/MH20/TP20 and stylus (L10mm)

*3: L=Measured length (mm)

Note: When the appearance of the natural stone measuring table varies according to the source, the high stability for which this material is known can always be relied upon.

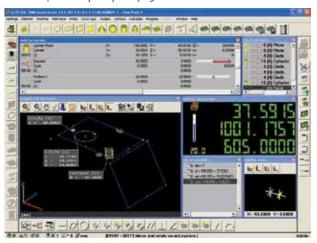

Applications that support your measurement tasks

MCOSMOS

GEOPAK (High Performance General-Purpose Measurement Program)

This module is the heart of the MCOSMOS software system and is used to measure and analyze geometric elements. All the functions are provided by icons or pull-down menus, freeing users from the need to memorize complex code numbers. It is unnecessary to switch windows for operations, so even novices can promptly select desired functions. Its main features include easier viewing of measuring procedures and results such as realtime graphic display of measurement results and a function for direct callup of elements from results graphics, which were not previously available.

Even if you upgrade to a CNC model in the future, the basic operations remain exactly the same, so you can become familiar with the CNC model's operations just by studying the additional.

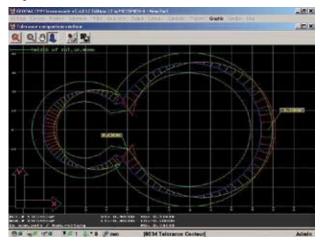

Cutting finished products

SCANPAK (Optional Contour Measurement Program)

Measures two-dimensional unfiltered profiles and performs various evaluations. It can evaluate profile measurement data, based on design data, and calculate various elements and inter-elements by specifying a range from the measurement data.

Resin molded or plastic formed products

CAT1000S (Optional Free Curved Surface Evaluation Program)

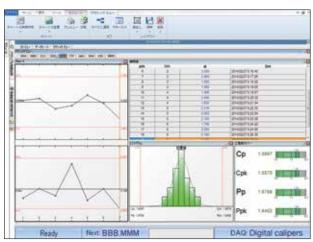

Checks and compares the workpiece with the CAD data and directly outputs the results in the form of CAD data in various formats. It supports SAT/STEP CAD data as standard, and software to directly convert from/to various types of CAD data is available as an option.

Small parts

MeasurLink (Optional Statistical Processing, Process Control Program)

This program can process various statistical analyses based on the measurement results. A real time display of a control chart allows earlier detection of potential defects such as wear or damage to cutting tools. This allows implementation of effective countermeasures including changes in cutting depth and working conditions. Using this program as a terminal, it is also possible to connect to a higher network environment for integrated control.

Whatever your challenges are, Mitutoyo supports you from start to finish.

Mitutoyo is not only a manufacturer of top quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed up by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver bespoke measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.
