Comparison measuring instruments which ensure high quality, high accuracy and reliability.

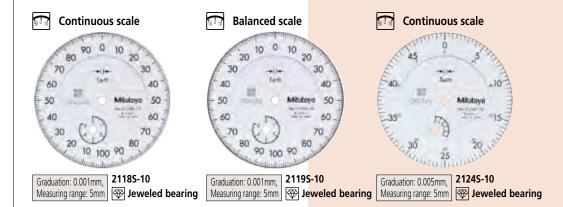

SERIES 2 — Standard Type, 0.001mm & 0.005mm Graduation

- Standard 0.001mm and 0.005mm graduation dial indicators having a bezel with an outside diameter of ø57mm. All types come with limit markers and a bezel clamp.
- The outer clamp and lifting lever (optional) can be attached to either the right or left side. These parts can be easily installed and removed without tools.
- Secure adhesion between the bezel and crystal as well as the use of an O-ring prevents water or oil penetration.
- The spindle is made of high-strength quenchhardened stainless steel which resists arduous use.
- A carbide contact point is used.
- A special alloy is used for the sector gears to provide improved wear resistance.
- The indicator uses jeweled bearings, providing excellent indication sensitivity and durability.
- Application of a hard coating on the surface of the crystal makes the gauge highly scratch- and chemical-resistant.
